

3D Character Artist

Dmytro Pysartsev

Creative 3D Artist with 5+ years of experience specializing in realistic and stylized characters and creatures - full pipeline from sculpt to game-ready asset or final render. Skilled in **high/low poly modeling, retopology, UV/UDIM, PBR texturing, grooming, lookdev, lighting, and rendering**. Baked by 12 years in product design leadership: production discipline, material accuracy, and an obsessive eye for detail.

Technical Skills:

- 3D Modeling & Sculpting
- Retopology
- UVMapping, UDIM
- PBR Texturing
- XGen Grooming
- Lighting
- Rendering
- Hard-Surface
- Anatomy, Silhouette & Color

Pipeline & Tools:

- ZBrush
- Autodesk Maya
- Marvelous Designer
- RizomUV
- Adobe Substance Painter
- 3D Coat
- Autodesk Arnold
- Marmoset Toolbag 5
- Unreal Engine 5
- Adobe Photoshop
- DaVinci Resolved

Languages:

English - Advanced(C1)
French - Intermediate (B1)
Ukrainian - Native

Experience:

Freelance 3D Character Artist | Independent | 2021 – Present

- Delivered 10+ realistic and stylized character/creature assets for game, indie and board-game clients, on tight deadlines.
- Full-pipeline creation: ZBrush sculpt - retopology - UV/UDIM - PBR texturing - lookdev/lighting - render or engine integration.
- Both game-ready (optimized topology, baked maps, poly budgets) and high-fidelity cinematic renders.

3D Artist (Contract) | Doghowl Games | 2023

- Modeled low-poly weapon assets optimized for real-time UE5.
- Balanced visual fidelity with performance targets across multiple assets, in close coordination with the core team.

3D Character Artist | Indie Project (Novel Universe) | 2021 – 2023

- Translated novel-based concepts into stylized 3D characters reflecting personality and story context.
- Prepared high-poly sculpts for 3D printing and physical board-game production.
- Designed original characters and mechanics integrated into the core gameplay.

Lead Product Designer | Swan Studio & 3.14Wood | 2011 – 2022

- Led custom interior-textile and exotic-wood production: design, prototyping, manufacturing, quality control — full cycle.
- Built a standardized client intake/documentation system, cutting initial project processing time ~50%.
- Managed full production cycle: concept, prototyping, manufacturing, and quality control.
- Deep hands-on mastery of materials, silhouette, color and spatial design the foundation of my 3D detail work today.

Education:

Master's Degree in Geodesy, Cartography and Cadastre
Odessa State Academy of Building and Architecture 2007-2012
Technical engineering program combining spatial design, topography, and drafting. Provided a strong foundation in accuracy, structure, and spatial thinking — skills that now enhance my 3D art workflow.
